THOMSON REUTERS®

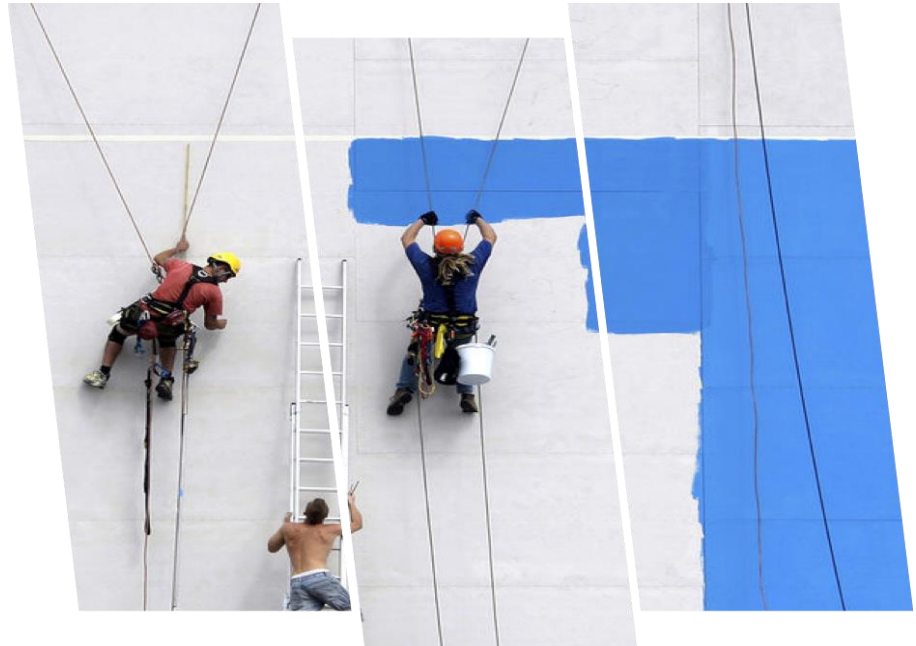

“..... but in this world nothing can be said to be certain, except death and taxes.”

Benjamin Franklin mentioned this way back in a 1789 letter.

Is technology not the third exception today?

We are in a world where
almost everything is
connected by technology

Disruption has become the
new normal

COUNTRIES ADOPTING DIGITAL TAX ADMINISTRATION

- **India** implemented new GST requirements to submit detailed transactional level data
- **Spain** implemented new requirement to submit daily invoice level detail
- **Italy** introduced B2B e-invoicing and updated quarterly VAT obligations with detailed invoice data
- **Costa Rica** is scheduled to make e-Invoicing mandatory for B2B transactions

2017

- **Norway** plans to adopt and implement SAF-T requirements
- **Brazil** introduced new obligations for payroll – (eSocial) and EFDREINF
- **Hungary** is in the process of introducing live invoice reporting requirements starting July 1, 2018

2018

- **Malaysia** plans to use analytics for E-Audits on payroll tax
- **UK's** HMRC plans to implement 'MTD' reporting for VAT in April 2019
- **Colombia** plans on adding e-Invoicing and e-Accounting requirements

2019

- **UK's** HMRC plans to introduce 'MTD' for other taxes besides VAT in 2020.
- **Australia's** ATO plans to further digitize its tax administration through extensive use of analytics
- **New Zealand** is following suite with Australia in its move to digital tax administration`

2020
